Remote Access Forwarding

Now you don’t have to go back to your office to forward your calls to another location. Just call the CenturyLink™ Update Center from any touch-tone phone to turn forwarding on, off, or to change your forwarding number.

**IT IS VERY IMPORTANT** that you set up Remote Access Forwarding immediately to prevent others from improperly billing long-distance calls to your account.

**To set up Remote Access Forwarding**

- Call the CenturyLink Update Center at 1 888-(your area code)-8052* from any touch-tone phone, or call *[78]* from your business phone number.
- If prompted, enter your area code and telephone number.
- You will be asked for a security code. If it’s the first time you’ve called the Update Center, enter the temporary code **1234**.
  
  **Note:** If you’ve already set up another service through the Update Center, such as Selective Call Forwarding, you can use the same security code for Remote Access Forwarding too. Enter your existing code instead of 1-2-3-4. You do not need to set up a new code.
- Recorded instructions will then guide you through setting your own permanent 4-digit security code. For your security, do NOT use the last four digits of your telephone number.
- Now you may select Remote Access Forwarding and continue with steps 3 through 6 on the back. Or, you can call the Update Center again to set up your forwarding number at a later time.

**Important:** For your protection, the initial set-up of your Security Code can only be done from your office telephone by dialing *[78]* to access the CenturyLink Update Center. Afterward, any changes to your service can be made by dialing *[78]* or by dialing the CenturyLink Update Center’s toll free number 1 888-(your area code)-8052* from any touch-tone phone.
