

Speed Calling 8

Make dialing numbers you call often fast and easy with Speed Calling 8. Simply assign a single-digit code to important and frequently called numbers.

To Program

Then enter a one-digit code + phone number, including any necessary area code or access code. Example: ***7****4** + Code **2** + area code **602** + 7-digits **555-1234**

To Dial

Example: Code **2** + **#** dials 555-1234

To program Speed Calling 8

- Make a list of your 8 most important or frequently dialed numbers.
- Assign each a one-digit code from 2 to 9.
- Lift the receiver and press ***7****4**.
- Press the one-digit code you've selected, followed by the telephone number assigned to that code. Include any area codes or access codes required to place the call.*
- You'll hear a tone to let you know the number is programmed.
- Repeat these steps for the other seven numbers.

To phone someone on your Speed Calling list

- Press the code assigned to the person you're calling, followed by the **#** key.

To change a programmed number

- Repeat the first five steps above. You don't need to reprogram the numbers you want to keep.

* Measured service and long-distance charges may apply for all completed calls. Optional services are not available in some areas.
